AI AND AUTOMATION / CAPABILITY STATEMENT

Managed AI

Your AI kept running, measured and improving

An ongoing service. We set up your AI platform, keep it secure and current, build new workflows into how your team works, and report on what it delivers.

FROM DAY ONE

Platform setup
On ChatGPT, Claude or PRESHos.

Sign-on and security
Directory sign-on, roles, approved plugins.

Connectors and skills
Connected to your business context.

A dedicated contact
One person who knows your setup.

EVERY MONTH

Workflow integration
A new workflow built into how you work.

Reporting
Usage, results and what changed.

Strategy briefing
What's new and what to do next.

Training
Sessions that keep your people current.

ONE ACCOUNTABLE EXPERIENCE

22Vets Technologies leads your engagement and coordinates delivery with **PRESHai, our AI capability partner**. You have one 22Vets point of contact from setup through ongoing support.

How we deliver

One 22Vets point of contact from discovery through rollout and support.

Listen

Identify one repeatable task that slows your team down. Involve the people who do the work.

Plan

Name a workflow owner, set a success measure, and agree on what the pilot can access and what needs human approval.

Deliver

Test the workflow with your team. Compare it with the current process using an agreed measure, such as time per task or rework.

Manage

Review results, access permissions, and approval rules as the workflow moves into daily use.

Support

Agree on training, ongoing support, and who owns each next step before expanding the rollout.

Start a Conversation

Bring us one workflow you would like to improve.
